# MAG2 (2-Wire) Series Flowmeters

MAG2IC - Flowmeter with Integrally Mounted Transmitter

MAG2RT - Remote Mounted Transmitter

MAG2RS - Remote Mounted Flowtube

The Foxboro® brand MAG2 Series Flowmeters are high performance, intelligent Magnetic Flowmeters based on field proven two-wire, loop powered technology. They offer the stable and accurate measurement of a traditional magnetic flowmeter with low power consumption, resulting in a lower overall cost of ownership. The flowmeters are provided in an integrally mounted transmitter configuration, or with a remote transmitter and flowtube with an interconnecting cable.

Remote mounting of transmitter is offered to allow access to the electronics when the measurement is not in an easily accessible location. Mounting brackets and hardware are provided for mounting the transmitter to a surface or to a nominal DN 50 or 2 inch pipe. The transmitter can be located up to a cable length of 70 m (233 ft) from the flowtube without loss of low level signal for flowtube sizes 25 mm (1 in) or greater, and up to a cable length of 30 m (98.4 ft) for flowtube sizes less than 25 mm (1 in).

### Wide Variety of Applications

- Corrosive liquid measurement
- Chemical solution measurement
- Drainage/waste disposal fluid measurement
- · Drinking water and waste water service
- · Industrial/agricultural water measurement
- Seawater measurement

### Summary

The Foxboro brand MAG2 Series Flowmeters are high performance, intelligent Magnetic Flowmeters based on field proven two-wire, loop powered technology. They offer the stable and accurate measurement of a traditional magnetic flowmeter with low power consumption, resulting in a lower overall cost of ownership.

#### **Business Value**

The MAG2 Series Flowmeters have no moving parts and are extremely durable and reliable. This simple design ensures low initial operating and maintenance costs, and therefore an overall lower cost of ownership.

# MAG2 (2-Wire) Series Flowmeters

### MAG2IC, MAG2RT and MAG2RS

#### Features / Benefits

- Two-wire construction greatly reduces wiring costs and facilitates retrofitting of older flowmeter technology
- Low power consumption allows use with battery or solar powered installations
- High Accuracy Flowmeter suitable for use in numerous process fluid measurement industries
- Approved/Certified by many agencies for use in hazardous area locations
- Proven magnetic flowmeter high rangeability with minimized wiring costs and maintenance costs
- Offered in flanged versions to ANSI class 300 and PN25, ranging in sizes 0.1" (2.5 mm) to 8" (200 mm) and wafer versions 1" (25 mm) to 4" (100 mm)
- · Remote mounting of transmitter allows access to the electronics when the measurement is not in an easily accessible location

#### **Physical Specifications**

**Approximate Weight** 

Size: Wafer Body: 25, 40, 50, 65, 80, and 100 mm (1, 1½, 2, 2½, 3, and 4 in) Flanged Body: 2.5, 5, 10, 15, 25, 40, 50, 65, 80, 100, 150, and 200 mm (3/8, 1/2, 1, 1½, 2, 2½, 3, 4, 6, and 8 in) Note: The 2.5 and 5 mm (0.1 and 0.2 in) Flanged Body Tubes are available with the Model MAG2IC Flowmeter only Flange Rating: ANSI Class 150 or 300; DIN PN10, PN16, or PN25 **Enclosure Rating:** Enclosure has the dusttight and immersion protection rating of IP67 as defined by IEC 60529, and provides the environmental and corrosion resistant protection rating of NEMA 4X **Transmitter Enclosure Material:** Low copper, aluminum alloy **Transmitter Enclosure Finish:** Standard: Baked acrylic paint Corrosion Resistant: Baked epoxy paint Terminal Box Material (Model MAG2RS only): Low copper, aluminum alloy Terminal Box Finish (Model MAG2RS only): Standard: Baked acrylic paint Corrosion Resistant: Baked epoxy paint **Display Cover Material:** Tempered glass Flowtube Body Case Material: Materials: Sizes 2.5 to 15 mm (0.1 to 1/2 in): CF8M ss Sizes 25 to 200 mm (1 to 8 in): 304 ss Measuring Pipe Material: 304 ss Flange Material: Sizes 2.5 to 65 mm (0.1 to 21/2 in) 304 stainless steel Sizes 80 to 200 mm (3 to 8 in) Carbon steel with a corrosion resistant paint **Process Wetted Materials:** Lining: PFA

**Electrodes** 

or Platinum

**Grounding Rings** 

316L ss, ASTM B574 (Hastelloy C-276 equivalent), Titanium, Tantalum, Nickel (except with Line Size Codes 002, 005, and 010), Zirconium, or Platinum-Iridium

316 ss, ASTM B575 (Hastelloy C-276 equivalent), Titanium, Tantalum, Zirconium,

Model MAG2RT (Remote Mounted Transmitter): 2.8 kg (6.2 lb)
